

Boswell Field

Hobart & William Smith Colleges, Geneva, NY

Client: Hobart and William Smith Colleges

Project Team:

Hobart and William Smith Colleges
Costich Engineering, P.C.
Clark Companies

Services: Field surveying, planning and design of football fields, parking and stormwater management services at Boswell Field.

Overview: A topographic survey including the location of all improvements within the survey limits (i.e. sanitary and storm systems including size, type, inverts, rims, top of grates, gas, water, electric, telecom and cable/fiber) was prepared. Survey located the playing fields and amenities, bleachers, buildings and provide detailed measurement at tie-in locations for an addition. Our findings were incorporated with existing information from the college facilities department, municipalities and utility companies to produce a 40 scale map of the site.
